The Rice Coil Springs

As attached to the Under Side of a Vehicle.

THIS IS THE SPRING

We have provided for the People.

ENORMOUS INCREASE IN SALES

— IN —

RICE COIL SPRINGS.

1887 CROP:

700 VEHICLES.

1889 CROP:

8,000 VEHICLES.

The Rice Coil Spring is at the head of all the family of Coil Springs. Its immense success has been so phenomenal that many imitations have sprung up to get some of the glory, if only by reflection There are all kinds of springs, but there is only one Rice Coil Spring, and that is sold by THE T T. HAYDOCK CARRIAGE COMPANY, of Cincinnati, O., and Albany, N. Y.

Look at our Unconditional Guarantee.

WE guarantee our Rice Coil Spring Vehicles to be the easiest riding and most durable made in the world.

If after six weeks' trial the Rice Coil is found not to be the easiest riding spring you ever used, we will exchange for any other style.

We have taken time to give them a thorough test before placing upon them our unconditional guarantee, and from results received from all parts of the United States and foreign countries, feel perfectly safe in giving them our indorsement and soliciting an order from each and every one.

Very truly yours,

THE T. T. HAYDOCK CARRIAGE CO.

POINTS OF SUPERIORITY

— OF THE —

RICE COIL SPRING

OVER ALL OTHER SPRINGS.

1. They are the easiest riding Springs in the world.
2. They are the most durable Springs ever made.
3. They have no side-motion.
4. They do not dive forward or backward.
5. They can not be broken by heavy loading or fast driving.
6. They do not weaken with prolonged use.
7. They are noiseless, because the Springs are always on a strain and the bearings are phosphor bronze.
8. They are very much lighter than any other Spring which has any valid claim for ease of motion.
9. They ride equally well with one or three persons.
10. They show less than any other Spring.
11. They will make a buggy last longer, because their great elasticity relieves the running parts from jars and twisting strains.

They are fully warranted, and we guarantee that they will give much better satisfaction than any Spring you have ever used.

A buggy that rides comfortably will always elicit more praise from the user and bring more credit to the maker than one superior in all other particulars, yet lacking in this.

The durability of a buggy depends as much on the elasticity of the springs as on the quality of material and workmanship employed in its construction.

The elasticity of a spring is in direct proportion to its length.

The Rice Coil Spring is nearly three times as long as the longest leaf spring in use.

This Is Not a New Thing

With those who use the "Rice Coil Spring," for by them it is considered a reliable friend, whose integrity has been tested, and a sense of restfulness, of security and unalloyed pleasure is experienced whenever they treat themselves to a ride; for this Spring is delightfully easy of motion, and rides perfectly level with one or three persons. They cannot be broken by heavy loading or fast driving.

TRY ONE.

A FEW WORDS FOR THE HAYDOCK HANDY TOP.

"HANDY" is no name for it, because it does not begin to express all its merits. To appreciate it, climb into one of the old-fashioned four-bow top buggies. The exercise is too much for a man, and for a woman a perfect terror. The Handy Top is perfectly lovely in comparison. Just step in like walking into a house, standing up straight; no sailors' antics or gymnastic feats to go through with; just sit down with perfect comfort. If you want to be happy,

TRY ONE.

Read what our Friends say who have sold and used Rice Coil Springs.

As you are aware, we were a little skeptical of the Rice Coil Spring when it was first introduced. We watched the first car load of Rice Coil Spring jobs that we put out very closely, and gave the spring a very thorough test, selling these buggies especially to livery men, and putting them into use at our branch houses. The result was entirely satisfactory to us. We have demonstrated to the trade that the Rice Coil Spring Buggies are the strongest, most durable and easiest riding springs on the market. Our trade is almost a unit in demanding jobs hung on Rice Coil Springs, and since you have added the Handy Top, you have made your line the most desirable of any for a dealer to handle.

LININGER & METCALF COMPANY, Omaha, Neb.

The Rice Spring Buggy with Handy Top is quite a favorite in this market, and an excellent seller. The trade is beginning to call for it quite extensively, and we believe it is going to be one of the best selling buggies we have ever handled

STANDARD IMPLEMENT COMPANY, Kansas City, Mo.

Please ship me another Rice Coil Spring Buggy, in Bx grade. (The Rice Coil Spring is a dandy.)

J. L. CLARK, Schoolcraft, Mich.

We consider the Rice Coil Spring the most comfortable riding spring that we have ever handled, and think it is going to be one of the best sellers in the market. It is durable and serviceable, and upon the whole, a capital good spring.

J. T. ADAMS & SON, Talladega, Ala.

The Rice Coil Spring beats anything I ever used in the way of pleasure riding, and too much cannot be done in introducing them to the riding public.

FRANK B. MILLER, Enon, O.

Please quote price on cart hung on Rice Coil Springs. I have a buggy hung on these springs, and it is considered by all who have ridden in it to be the easiest riding buggy in town. There are several here who want one like it. G L SMITH, Prairie View, Kas.

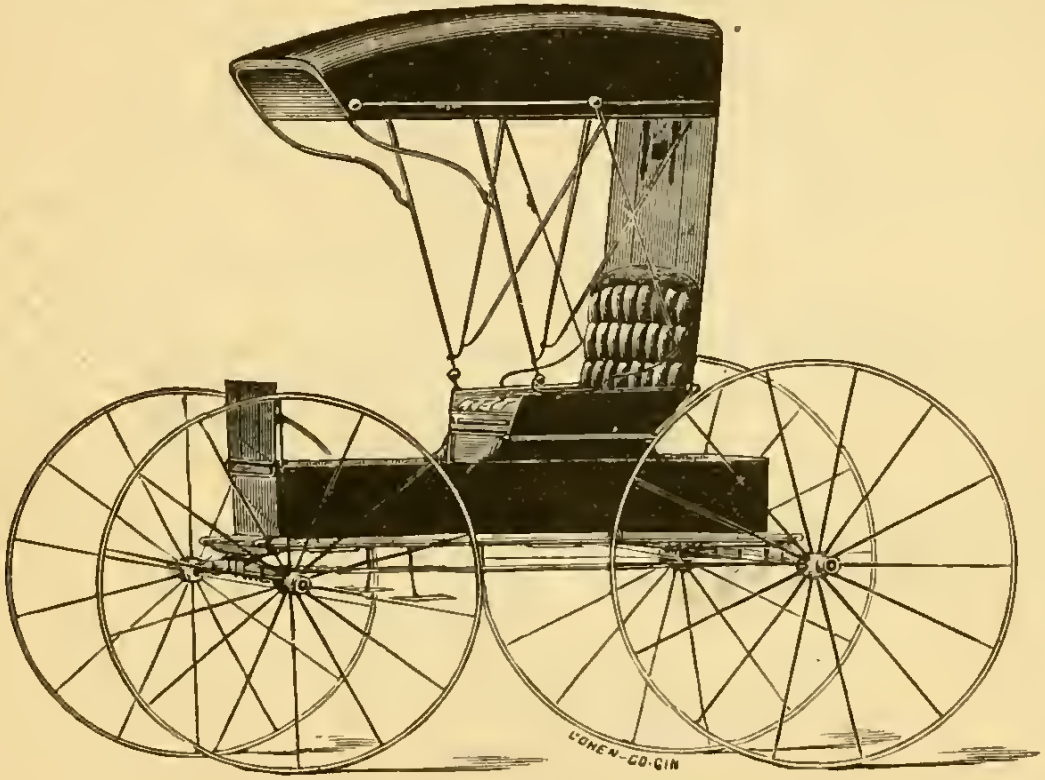
Rice Coil Springs are fine. Sorry I did not buy all Rice Coil vehicles in last order you shipped me. Send two more on my order to Charleston, S. C.

H. D A. BIEMAN, Walhalla, S. C.

I can recommend the Rice Coil Springs. Am satisfied they are the most perfect and the easiest riding springs I ever had. All of my customers who have tried them, pronounce them the best. I expect to sell a large number this season.

N. F. INGRAHAM, Wallingford, Conn.

OUR LEADER.



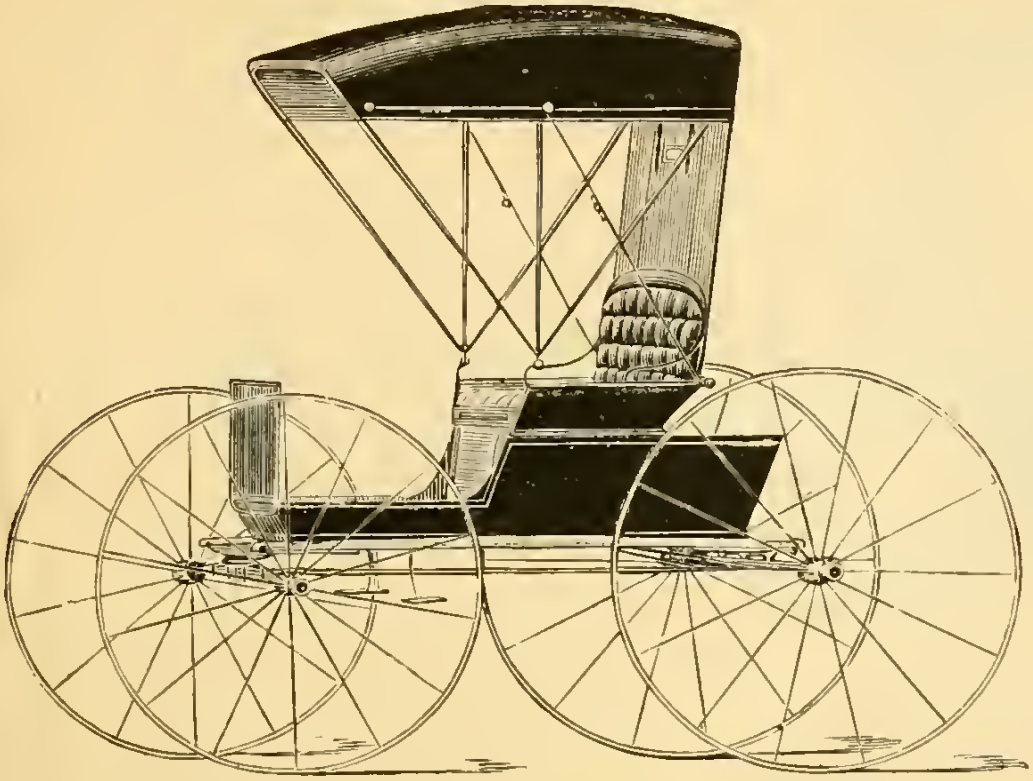
No. 28.
Side Bar Buggy Hung on Rice Coil Springs.

I have had quite an experience with Rice Coil Spring Vehicles, and have been induced to believe there is nothing like them. I sold a large number during 1889.

S. J. ROOT,
Webster City, Iowa.

I have been in the livery busines for eleven years, have used all kinds of springs, and can say that I consider the Rice Coil Spring the easiest riding and best spring ever put on the market. I can make a forty-mile drive in a Rice Coil Spring, and not feel the least tired. I never thought there was so much superiority in springs until I purchased a Rice Coil Spring Buggy.

H. D. CHAMPLIN,
Hudson, Wis.



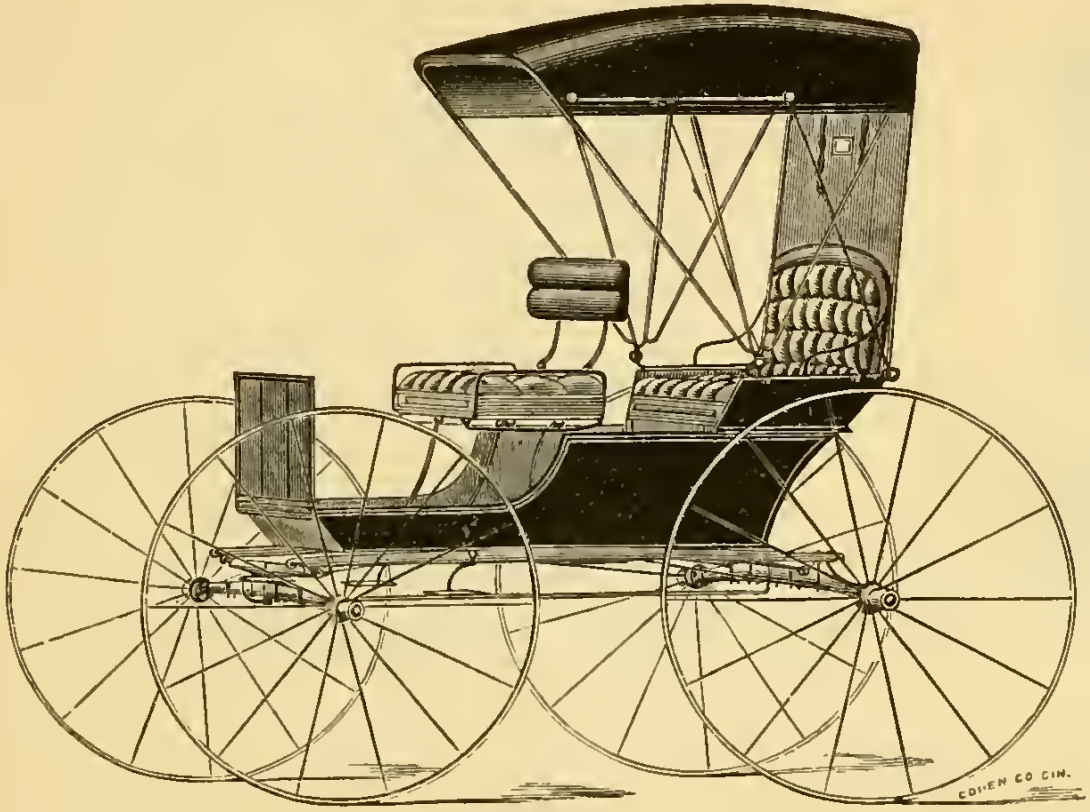
No. 30. Corning Hung on Rice Coil Springs.

Last spring I purchased one of your most excellent Rice Coil Spring Buggies, through your agent here, which is giving entire satisfaction, and is in good condition yet. However, I want another one this spring of same kind. I can get better satisfaction out of the Haydock goods than any other.

DR. J. S. MONTGOMERY,
Huntsville, Ohio.

We have sold your Rice Coil Spring carriage that we bought of you to our banker, Mr. A. A. Horton, and he thinks it is the easiest and best riding carriage he has ever used, and would not use any other. Any one can refer to him for any further information, and we will send you his statement in a day or two.

GEORGE W. SMITH & SON,
Pomeroy, Iowa.



No. 63.
Jump-Seat Buggy Hung on Rice Coil Springs.

I like the Rice Coil Spring splendid. Please change my order and substitute a Rice Coil Spring in place of the end spring buggy.

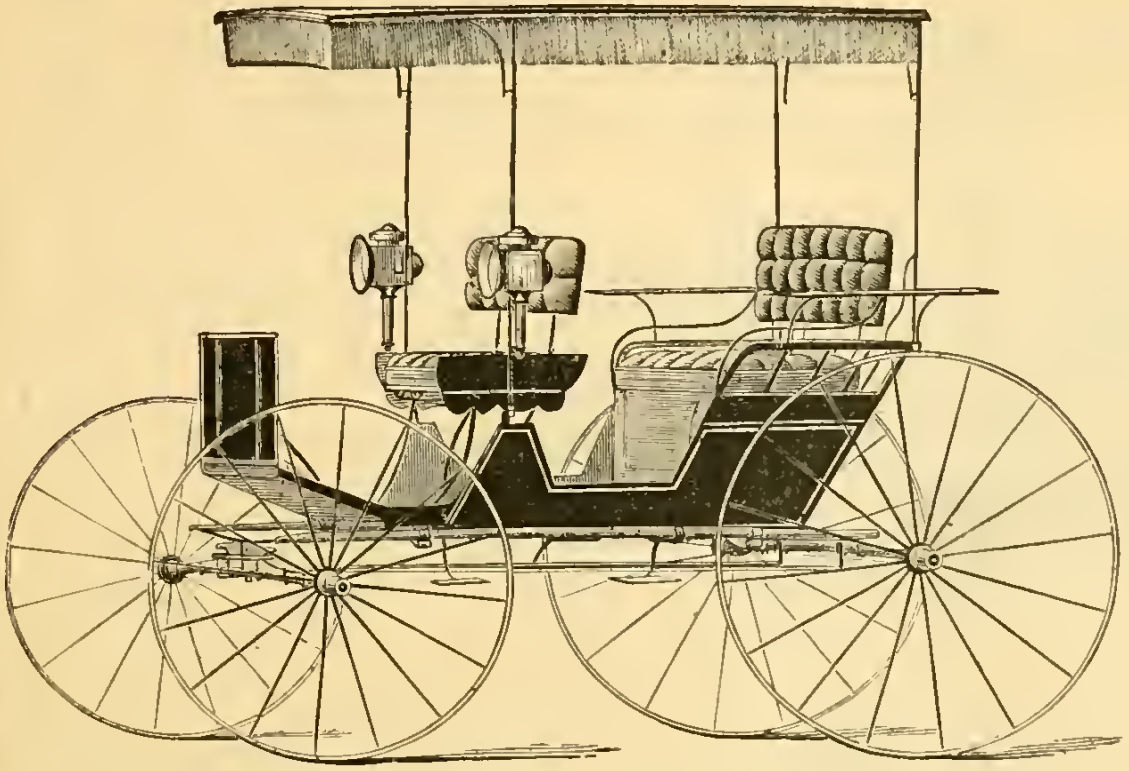
J. W. BARKLEY,
Bakersville, Pa.

We have both used and sold the T. T. Haydock Buggies, and find them satisfactory in every respect. The Rice Coil Springs are superior to any we know of.

ROGERS BROS.,
Arnaudville, La.

Enclosed find check for last buggy shipped. It was received O K, and we are well pleased with it. The Rice Coil Spring cannot be beaten.

FRED PUCKHABER,
Jacksonville, Fla.



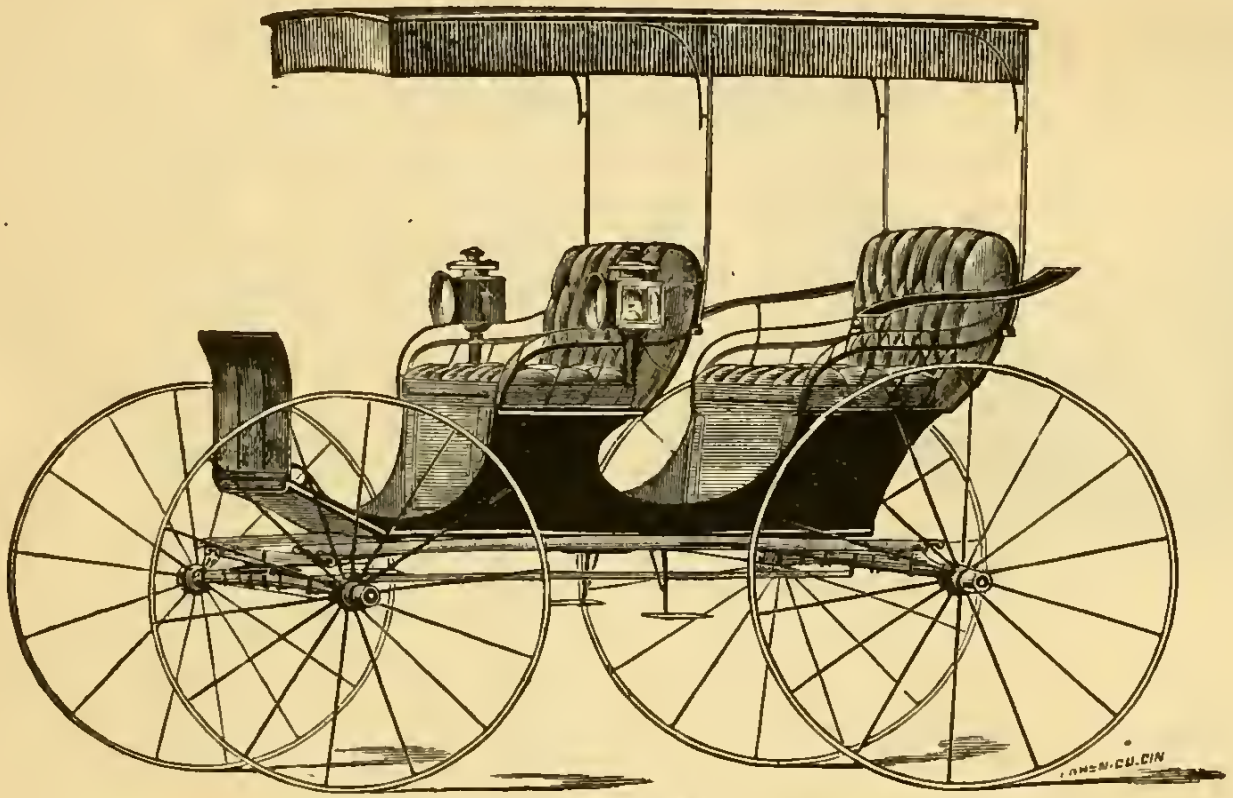
No. 100—New Rail Surrey Jump-Seat, Hung on Rice Coil Springs.

About two years ago seeing your Rice Coil Spring vehicles highly recommended, I sent for a sample job, without much faith in it, but lately hearing the sample job of two years ago so well spoken of, I have been induced to try them again, and expect I will have to have a good many this season.

PETER J. CARKHUFF,
Oak Grove, N. J.

We are much pleased with the Rice Coil Spring Buggy, which arrived a few days ago in good order. Send us at once a Rice Coil Spring Cart.

DUSENBURY & SARVIS,
Socastee, S. C.



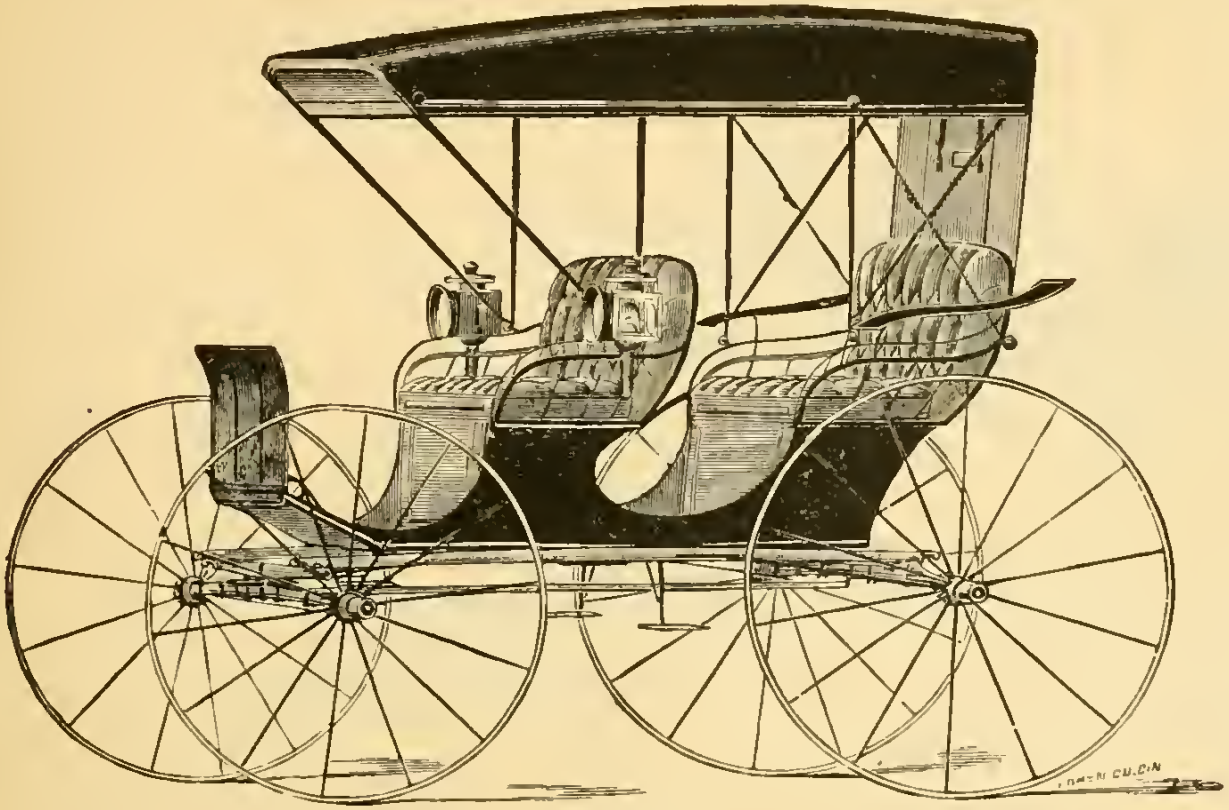
No. 105.
Canopy Top Surrey Hung on Rice Coil Springs.

Please find enclosure for Rice Coil Spring Buggy received a few days ago. We would like to say that it has been tried by us, and we heartily recommend it to be the best spring we ever rode on. It is perfect and we will do our best to introduce them in this country among our customers, and hope to handle a great many.

S. S. PEARCE & SON,
Bunkie, La.

Send me a Rice Coil Spring Buggy just like the last one. It is really a fine buggy.

W. W. HYATT,
Cambridgeboro, Pa.



No. 95.
Extension Top Surrey Hung on Rice Coil Springs.

Please ship us at your earliest convenience, one three-quarter "B" grade buggy on Rice Coil Springs, with Handy Top. We have a friend in the implement business who wishes us to try a different coil spring, but we like the "Rice," having tried it.

L. B. CHILTON & CO.,
Eddy, Texas.

Will say for the Rice Coil Spring that every one that I have sold has given good satisfaction, and that I think they are as fine riders as any on the market. I can sell them when it is hard to sell any others.

B. V. JEWELL,
Mt. Upton, N. Y.

TRY ONE.

We have had excellent success with the Rice Coil Springs for the past two years, and during this time have not heard of any of the springs breaking. They have proved satisfactory even under extraordinarily severe tests. The relief given vehicles as well as passengers on the "upward bound" in passing over obstructions, is worthy of consideration in selecting an easy riding spring for vehicles. I consider the Rice Coil Spring the easiest riding spring I have ever used. A trial is sufficient proof of its inherent superiority. A. B. MILLER, North Manchester, Ind.

In all my experience I have never handled a vehicle that has given me and my trade as much satisfaction as the Rice Coil Spring Buggy. It rides easy and smooth over rough roads, and is, without a question, the coming spring for the future. I find it quite difficult in my territory to sell anything else but the Rice Coil Springs. Have had this year in the neighborhood of fifty, and shall certainly want a good many next year. J. E. LAIDLER, Hawkinsville, Ga.

I have handled in the past two years a large number of the Rice Coil Spring Buggies, and they have given the best of satisfaction in every case. Shall expect to use a very large number this coming season. GEORGE C. CRIBB, Milwaukee, Wis.

We have sold several of your Rice Coil Spring Buggies this past season, and find they give unqualified satisfaction to purchasers. They certainly ride easy, and must in the near future be the leading springs in the market. GEORGE BOHON, Harrodsburg, Ky.

We have sold your Rice Coil Spring Buggies for the past three seasons, and have yet to hear of a single job proving faulty. We have ridden in buggies hung on these springs, and tested them in every way, but they are ahead of anything in the market for easy riding and durability. Our customers think the same way, and we find them sellers.

CRANE BROS. & CO., Yazoo, City, Miss.

I sold one of your Rice Coil Spring Buggies late last season, and the customer is very much pleased with it. I like it, and will push the sale of the Rice Coil Spring Buggy this season.

A. L. JAMISON, Woodstock, Va.

We bought a car load of your buggies and carriages, and in the car we had six Rice Coil Spring vehicles. We took one of the single-seated Rice Spring jobs for our own use, and sold the other five. Then we had another customer who wanted one, and we had to sell him the Rice Coil Spring Buggy we were using ourselves. Are very sorry we did not get more of them in the car. All the springs are giving excellent satisfaction.

HUGGINS & GRIFFITH, Anamosa, Iowa.

We find the Rice Coil Spring Buggy you make growing to be a great favorite. Have never had one to break, and when sold always makes a demand for more.

S. B. MARTINCOURT & CO., Butler, Pa.

Am very much pleased with the Rice Coil Spring Buggy. It is the easiest riding spring we ever had, and sells rapidly. B. M. WASHBURN, Montgomery, Ala.

We sold nine of the Rice Coil Spring Buggies this past season, and all the customers are well pleased with them. One man, who weighs 210 pounds, says: "It is the best spring I ever rode on, and can't be beat." It is, without a question, the coming spring for side-bar vehicles.

W. V. ZARTMAN, Glenford, O.

I have been handling buggies for the past several years, have sold all kinds of springs I ever heard of, and am justified in saying that the Rice Coil Spring is far superior to anything we have ever had in this section. This season I have had fourteen different kinds of buggies in my wareroom at one time, and the Rice Coil Spring was sure to sell first. They are the easiest and most durable spring ever invented. Will say further, that they are the best sellers, and give the best satisfaction of any springs I ever handled. The Rice Coil Springs take the cake Send me twenty-five more of them. GEORGE E. WALLACE, Westchester, O.

Everybody is talking of the wonderful superiority of the Rice Coil Spring over other springs, and those who have others would like to trade same for the Rice Coil. All those that I have sold are giving good satisfaction, and I expect to sell a great many this season.

M. LONGNECKER, McClure, O.

I duplicate my order for the Rice Coil Spring vehicles because I consider them the easiest riding springs that have ever been attached to a side-bar carriage for any road, rough or smooth. On a rough road they do not give that short, sharp jerk that is so common to others, and on a smooth, hard road they are exempt from that jar and quiver that all other springs are subject to. For these reasons I have been able to place them in the hands of those who were out of health, and nervous and fussy people generally, who express much pleasure and satisfaction with the spring, and say they would not exchange it for any other they have ever seen. I have never heard of a customer who has purchased the Rice Coil Spring but what was well pleased with it. I am satisfied that it cannot be broken, for it assumes the character of an old-fashioned thoroughbrace as soon as it passes the center.

H. L. LIBBY, Norway, Me.

I have been running one of your buggies for six years, and am so well pleased with it that I now want a Rice Coil Spring Buggy. The one I have has made over 12,000 miles over rough roads, and out in all kinds of weather. I have spent but very few dollars for repairs.

REV. Z. W. BEDENBAUGH, Prosperity, S. C.

We are in receipt of your price list. Your buggies have met with entire satisfaction. We think they are very good for the money, and as soon as we need more, will secure them from you. Enclosed find check to the amount of last bill.

PAWELSKI & SMITH, Paterson, N. J.

One word more. The buggies are doing remarkably good work, and giving entire satisfaction.

M. C. CORNWALL & SON, Randolph, N Y.

Enclosed find check for buggy shipped me February 27th. I received it March 3d, and sold it the same day. It was the finest job for the money I ever saw.

O. W. WELCH, North Adams, Mass.

In reply to your inquiry regarding my opinion of your Rice Coil Springs, I will say that I have sold and hung a number of these springs, besides using them myself, and I consider them to be unquestionably the easiest riding springs I have ever seen, and can say further that I do not know of a man who has used those springs who would use any other.

HENRY VAN HOESEN, Albany, N. Y.

I wish to say a word in favor of the Rice Coil Springs. We bought a lot of your carriages, and there was one that had the Rice Coil Springs. My customers did not want to try it, so I took it for my family, and will say that it is the best and easiest riding spring I ever saw. My wife rode with me the first time I ever used the carriage, over as rough a road as can be found in any part of Maine, and she said she never rode so easy. I will say without hesitation that I would not be without one. I think we shall have a good sale for that spring

ALBERT ALLEN & SON. Wellington, Me.

Please ship me a No. 95 with the Rice Coil Springs. I would like some buckboards hung on Coil Springs, and some Concord bodies on the same spring, as I think it will stand much better than the springs usually used. I tried the one sent me, and it is just right. It is a dandy. In your book where yon speak of "That Ride" you don't half express it, and I think if you will get up some buckboards and Concords hung on this spring I can get a big trade on them.

C. W. A. BROWN, Malone, N. Y.

My experience in regard to the Rice Coil Springs is very limited. The few that I have sold have given perfect satisfaction, also others that have used them speak in the highest terms of them.

C. H. LEWIS, Lovell, Me.

Some time ago I got a sample (Your No. 30, Rice Coil Spring Buggy). I have let several of my customers ride in it. They all call it the best spring they ever rode on. One doctor thought so well of it that he has disposed of a fine high-priced carriage, and has given me an order for one. I am well pleased with my own. W. J. BARON, Geneva, N. Y.

The Rice Coil Spring is just what every physician needs. I was a little shy of its good qualities until I tried it; that carried conviction to me of its merit. Every one who gives these springs a good, fair, honest test will soon be convinced that they cannot be outdone for comfort and durability. JOSIAH HASBROUCK, Jr. M. D., Port Ewen on Hudson, N. Y.

I have been using the Rice Coil Springs for the past three years, and so long as I can procure them, shall use no other. During the twenty years I have been riding over the pavements of Albany, I have tried a great number of springs, but do not hesitate in saying that the Rice Spring is superior to them all. It seems to me that if every physician could be made acquainted with the ease and comfort (in riding) obtained by using the Rice Coil Springs, they would not be long in securing them.

S. H. CARROLL, M. D., Albany, N. Y.

So far as I am able to judge, my customers are well pleased with the Rice Coil Spring Personally, I prefer them to any spring I ever rode on.

H. H. SIMONS, Oil Mills, N. H.

My customers who have used your springs like them and the way they ride very much. I like them and they please the customers.

WILLIAM E. DANN, Norwalk, Conn.

I have sold a number of your Rice Coil Spring vehicles, and every one has given the very best satisfaction. One man to whom I sold last year, and who has had his vehicle in constant use, informed me that he would not have any other kind of spring; that he never pulled up for water brakes, or anything of that sort, but went right along and rode easily over everything. I consider it, without a question, the best vehicle spring made. Have handled your vehicles for a number of years and have always found them to give excellent satisfaction.

WM. J. MILENZ, West Sand Lake, N. Y.

Will you kindly inform me what is your price on Rice Coil Spring phaeton body cart? In reference to the Rice Springs, I have given them a thorough test in the country, and find them the best springs I have ever used. H. A. HERBERT, M. D., Manasquan, N. J.

I have been using one of your Rice Coil Spring buggies this past year, and it is giving excellent satisfaction. I have been able to drive forty miles over rough country roads without having the slightest backache, something I have never been able to do with any other spring. For easy riding, be the roads rough or smooth, the Rice Coil Spring has no equal.

W. C. MARSELIUS, Albany, N. Y.

We have had several carloads of your Rice Coil Spring vehicles, and in every case where we have sold them they have given the very best satisfaction. Our customers claim that they are the easiest riding springs, which induced one of our firm to take one for his own use, and he now says he would not dispose of it at any price if he thought he could not get another like it. Our sales on Rice Springs are more than we anticipated. We intend to push them.

CARITHERS & BETTS, Athens, Ga.

The Rice Coil Spring Buggies you shipped us are received, and think they are going to be the best sellers I have in the store. We like the Rice Coil Spring better the more we use it. I am going to build up a large trade on them. C. W. FERRIS, Manchester, Iowa.

THE

RICE COIL SPRING

IS THE

LIVERYMEN'S FAVORITE

AND ACKNOWLEDGED BY THEM

Superior to any other Spring

IN RIDING AND WEARING QUALITIES

THE T T. HAYDOCK CARRIAGE CO , CINCINNATI, O.:

Gentlemen—At our County Fair, last November, I had three pieces of timber, each 20 feet long and 8 inches square, which I placed in front of the grand stand, about 15 feet apart, and with a speedy horse hitched to one of your RICE COIL SPRING BUGGIES drove over the timber at a sweeping trot, without damage to spring or buggy. I sold two of your Rice Coil Spring Buggies to a liveryman They are giving perfect satisfaction.

Yours truly,

A. T. BENEDICT
